THE A.B.A. NUMERICAL SYSTEM

This issue of the American Bank Reporter contains the complete designation of the banks and trust companies of the United States according to the numerical system of the American Bankers' Association. The number will be found on the line with the bank title, preceded by the section mark. The use of the system is optional, though it is highly recommended by those who have given it a rigid trial and thorough examination. The following explanation may simplify matters:

The reserve cities are each designated by a prefix number. The cities are numbered from 1 to 49 inclusive, in the order of their population according to the Government census of 1910. The lower numbers are thus assigned to the larger cities. In the cities which are designated by a prefix number, banks are numbered according to seniority, the individual numbers of the banks following the prefix numbers of the cities. The Treasurer and Assistant Treasurer of the United States and the post offices are also numbered in these cities.

The prefix numbers from 50 to 99, inclusive, have been assigned to the States, which have been divided into five sections. Those containing the principal collecting centers, namely, New York, Pennsylvania, Illinois, Missouri and California, have been given the first numbers in their respective sections—50, 60, 70, 80, 90—to indicate that the following numbers in each section represent the States in the same territory. Numbers 59 and 89 are left blank, but may be used in the future to number the banks in Canada and Alaska. With the exception of the five States heading each section, the States are numbered in alphabetical order in each section.

In numbering the banks in each State, other than these in the reserve cities, the process was as follows:

The State prefix numbers together with the number assigned by the Numerical Committee were used in numbering the banks in cities and towns other than reserve cities, as before mentioned; the State prefix number was used and then the towns were placed in their relative order according to population and commencing with the largest city, each bank was numbered in consecutive order according to seniority in each city or town excepting in towns having only one bank, in which case the banks are numbered in alphabetical order according to towns; blank numbers are left to be used for new banks in all cities of 5,000 population or over and also at the end of each State.
